N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A

THIS MOTOR DOES NOT HAVE A UNIPOLAR CONNECTION.

TORQUE CURVE

DRIVER: JK0220 | CURRENT: 1,0A/Ph | VOLTAGE OF DRIVER: 24VDC | STEP/REV: 400 (HALF-STEP)

* THIS GRAPHIC SPEED SCALE IS ONLY CONDITIONED ON THE HALF STEP DRIVER SETING.

**PULL-OUT TORQUE;

NOTE: THE MOTOR SPEED (RPM) VARIES ACCORDING TO 3 VARIABLES, STEP/REV (AMOUNT OF STEP TO COMPLETE 1 LAP), PPS (PULSES PER SECOND) AND THE TYPE STEP OF DRIVER, BEING FULL STEP (1/1), HALF STEP (1/2) AND MICROSTEPPING (1/4, 1/8 AND 1/16). THE SPEED (RPM) CAN BE CALCULATED WITH THE FOLLOWING EQUATIONS:

$$\text{STEP/REV} = \left(\frac{360}{\text{ANGLE STEP}} / \text{TYPE STEP OF DRIVER} \right) \quad \text{AND} \quad \text{RPM} = \frac{\text{PPS}}{\text{STEP/REV}} \times 60$$

DIMENSIONS

UNIT: mm
